

SCIENCE IN THE PARK

OCTOBER 1ST, 2022

[SKIP TO REGISTRATION](#)

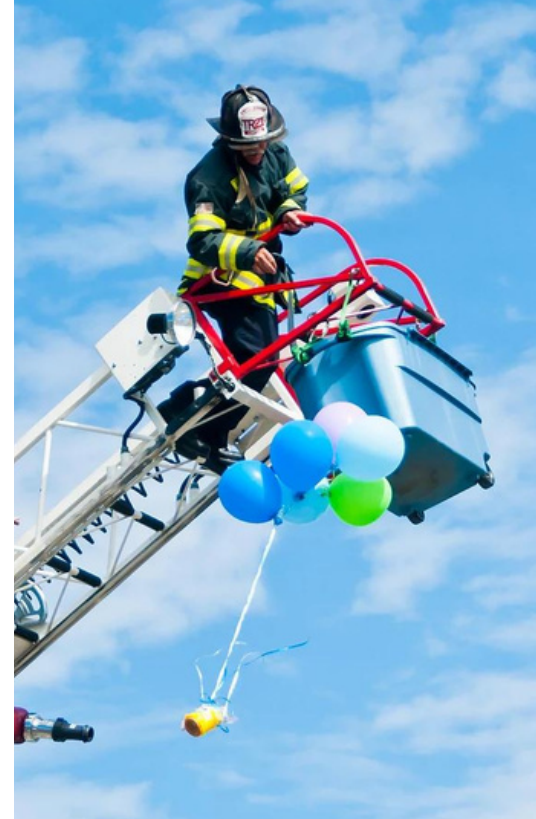

WHAT IS

SCIENCE IN THE PARK?

Science in the Park started in 2011 with the goal to encourage people of all ages, interests, and backgrounds to learn more about STEM (Science, Technology, Engineering, Math), the environment, and health, while having fun and supporting the school districts in District 2. Since then, we've had 5 successful events, bringing thousands of people together each time at the Alden E. Oliver Sports Park in Hayward to enjoy this free event.

As with many events in 2020, Science in the Park was cancelled due to COVID-19. However, our staff and the 100+ partnerships we've created over the years are ready to launch Science in the Park bigger, better, and safer for October of 2022, in a new location!

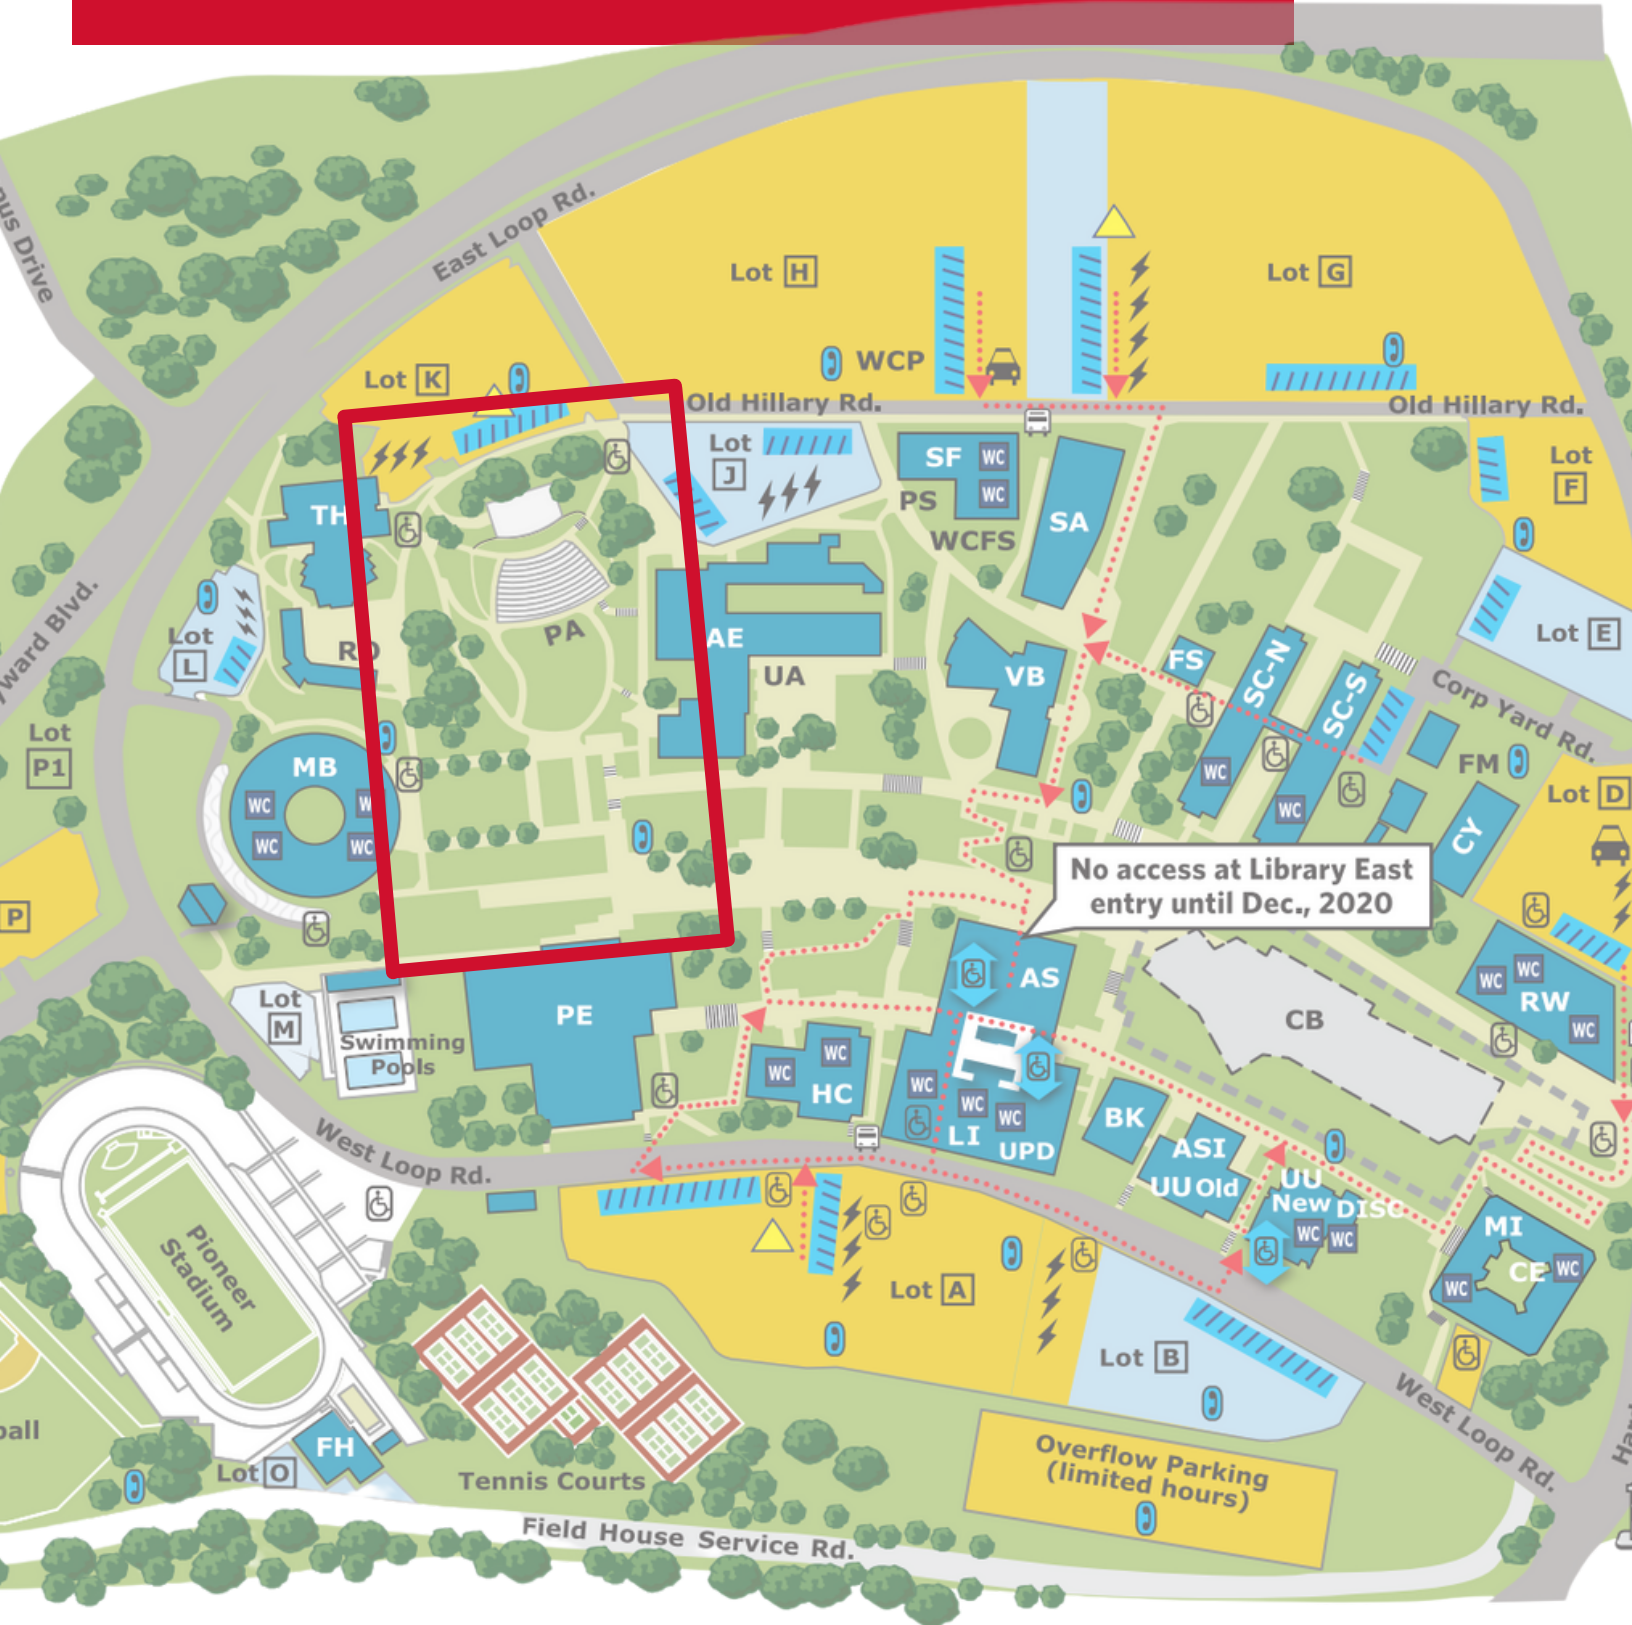

PARTNERSHIPS AND ACTIVITIES

Science in the Park has always been a well anticipated and attended event in the community. Over the past decade, we have cultivated many partnerships such as: the four school districts in District 2, Alameda County Office of Education, local police and fire departments, H.A.R.D., NASA, Chabot Space and Science, Chabot College, Math Science Nucleus, Kaiser, Wildlife Associate, Safe Routes to Schools, and many more. Check us out at scienceinthepark.org.

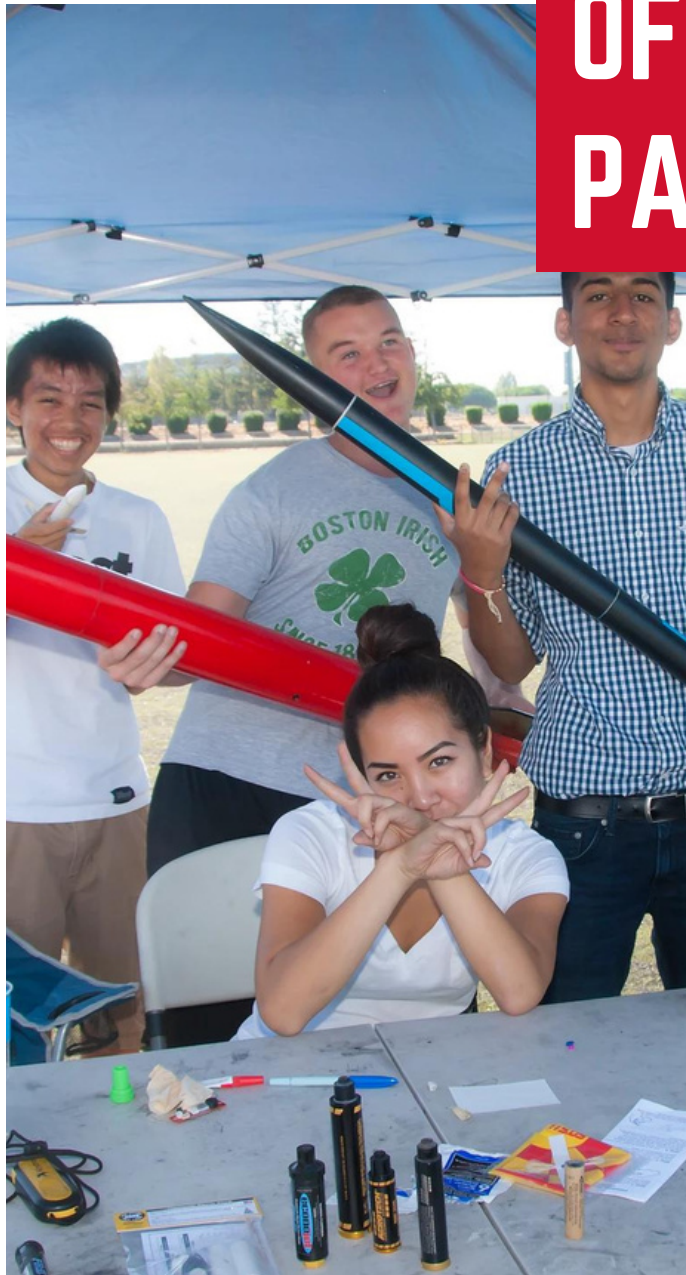

- Egg Drop contest
- Interactive STEM Activities from local teachers and school districts
- LEGO Activities
- Robotics Demonstrations
- Educational Animal Programs
- Virtual Reality Games
- 3D Printing
- Water Rockets
- Health Screenings
- Performances from local artists and speakers
- Bike Rodeo
- Jump Houses
- Food Trucks
- Much more!

2022 EVENT SITE

YOU ARE THE CORE OF SCIENCE IN THE PARK

Science in the Park benefits the Hayward Area Recreation and Park District (H.A.R.D.) Children's Programs, New Haven Schools Foundation, Fremont Education Foundation, Newark Educational Foundation, and Hayward Education Foundation. An additional \$1,000 is also given to the organization of choice for the winner of the Elected Officials Competition. Your participation will help us deliver a great festival that attracts even more visitors. Join us in the effort to expand this fun festival and increase STEAM learning amongst our youth. For more information, please visit www.scienceinthepark.org. Unleash your curiosity, discover your inner innovator and become a supporter of Science in the Park!

NEXT STEPS!

- Complete the [2022 Participant Form](#).
- Save the date, and start brainstorming the hands-on activity you plan to share on October 1st
- Look forward to being assisted, appreciated, and fed (we will give you credits for a lunch from the food trucks!)
